

Ejercicios de resolución de conflictos

1.Crea un repositorio llamado conflictos-git y añade un readme.md (puedes marcar la pestaña add readme.md cuando lo creas desde GitHub).

The screenshot shows the GitHub repository creation interface. The 'General' tab is selected. The 'Owner' is 'IsaacCM4' and the 'Repository name' is 'conflictos-git'. A green checkmark indicates 'conflictos-git is available.' The 'Description' field is empty. The 'Configuration' section shows 'Choose visibility' set to 'Public', 'Add README' set to 'On', 'Add .gitignore' set to 'No .gitignore', and 'Add license' set to 'No license'. A green 'Create repository' button is at the bottom right.

General

Owner * / Repository name *

IsaacCM4 / conflictos-git

Great repository names are short and memorable. How about **potential-octo-broccoli**?

Description

0 / 350 characters

2 Configuration

Choose visibility * Choose who can see and commit to this repository Public

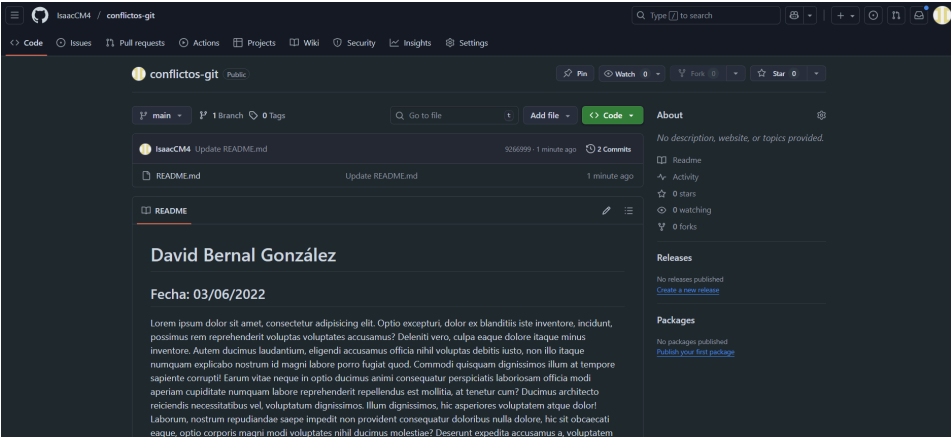

Add README READMEs can be used as longer descriptions. [About READMEs](#) On

Add .gitignore .gitignore tells git which files not to track. [About ignoring files](#) No .gitignore

Add license Licenses explain how others can use your code. [About licenses](#) No license

Create repository

2.Añade en el repositorio el siguiente contenido:

The screenshot shows the GitHub repository page for 'conflictos-git'. The repository is public and has 1 branch (main) and 0 tags. The README file is visible, showing the author 'David Bernal González' and the date 'Fecha: 03/06/2022'. The README content is a Lorem Ipsum text. The right sidebar shows the repository's activity, including commits, issues, and releases.

IsaacCM4 / conflictos-git

Packages No packages published Publish your first package

3. Clona el repositorio remoto conflictos-git a tu dispositivo (git clone).

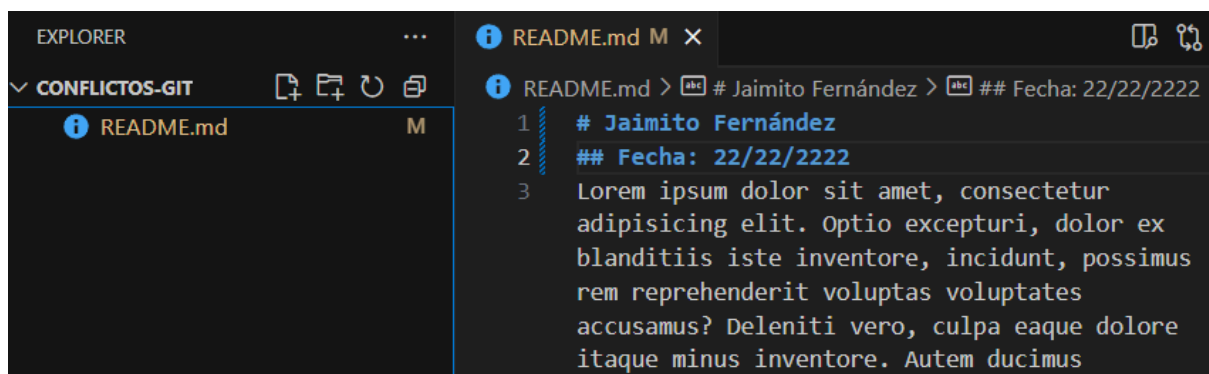

```
isaac@DESKTOP-I8RHM0 MINGW64 ~/Desktop
$ git clone https://github.com/IsaacCM4/conflictos-git
Cloning into 'conflictos-git'...
remote: Enumerating objects: 6, done.
remote: Counting objects: 100% (6/6), done.
remote: Compressing objects: 100% (3/3), done.
remote: Total 6 (delta 0), reused 0 (delta 0), pack-reused 0 (from 0)
Receiving objects: 100% (6/6), done.

isaac@DESKTOP-I8RHM0 MINGW64 ~/Desktop
$
```

4. Modifica desde GitHub, el repositorio poniendo tu nombre y la fecha de hoy en lugar del actual.

5. Ves al repositorio local y modifica el nombre por Jaimito Fern ndez y pon como fecha 22/22/2222

6. Intenta hacer un push al repositorio remoto

```
isaac@DESKTOP-I8RPMC0 MINGW64 ~/Desktop/conflictos-git (main)
● $ git commit -m "Modifico readme.md"
[main 4eac8d2] Modifico readme.md
1 file changed, 2 insertions(+), 2 deletions(-)

isaac@DESKTOP-I8RPMC0 MINGW64 ~/Desktop/conflictos-git (main)
● $ git status
On branch main
Your branch is ahead of 'origin/main' by 1 commit.
(use "git push" to publish your local commits)

nothing to commit, working tree clean

isaac@DESKTOP-I8RPMC0 MINGW64 ~/Desktop/conflictos-git (main)
○ $
```

```
isaac@DESKTOP-I8RPMC0 MINGW64 ~/Desktop/conflictos-git (main)
⊗ $ git push
To https://github.com/IsaacCM4/conflictos-git
! [rejected]        main -> main (fetch first)
error: failed to push some refs to 'https://github.com/IsaacCM4/conflictos-git'
hint: Updates were rejected because the remote contains work that you do not
hint: have locally. This is usually caused by another repository pushing to
hint: the same ref. If you want to integrate the remote changes, use
hint: 'git pull' before pushing again.
hint: See the 'Note about fast-forwards' in 'git push --help' for details.

isaac@DESKTOP-I8RPMC0 MINGW64 ~/Desktop/conflictos-git (main)
○ $
```

7. Haz un git pull y ves que Git no puede auto-resolver el conflicto. Por lo que nos deja la responsabilidad a nosotros como programadores:

```
isaac@DESKTOP-I8RPMC0 MINGW64 ~/Desktop/conflictos-git (main)
⊗ $ git pull
remote: Enumerating objects: 5, done.
remote: Counting objects: 100% (5/5), done.
remote: Compressing objects: 100% (2/2), done.
remote: Total 3 (delta 1), reused 0 (delta 0), pack-reused 0 (from 0)
Unpacking objects: 100% (3/3), 980 bytes | 39.00 KiB/s, done.
From https://github.com/IsaacCM4/conflictos-git
9266999..22844c6  main      -> origin/main
Auto-merging README.md
CONFLICT (content): Merge conflict in README.md
Automatic merge failed; fix conflicts and then commit the result.
```

```

  accusamus a, voluptatem quas, nemo consequatur praesentium officia
  quo eaque culpa labore ad, reiciendis libero ratione eos veritatis
  aliquid. Accusamus soluta repellat reiciendis vitae eius libero
  error autem. Accusamus expedita doloribus deserunt optio ipsa
  tempora in provident laboriosam, aliquid eum nostrum nulla commodi,
  placeat perferendis tenetur quo possimus debitis quia sunt iste
  repellat et? Eius repudiandae recusandae perferendis. Et, ad!
  Distinctio velit accusantium quis labore adipisci accusamus facilis
```

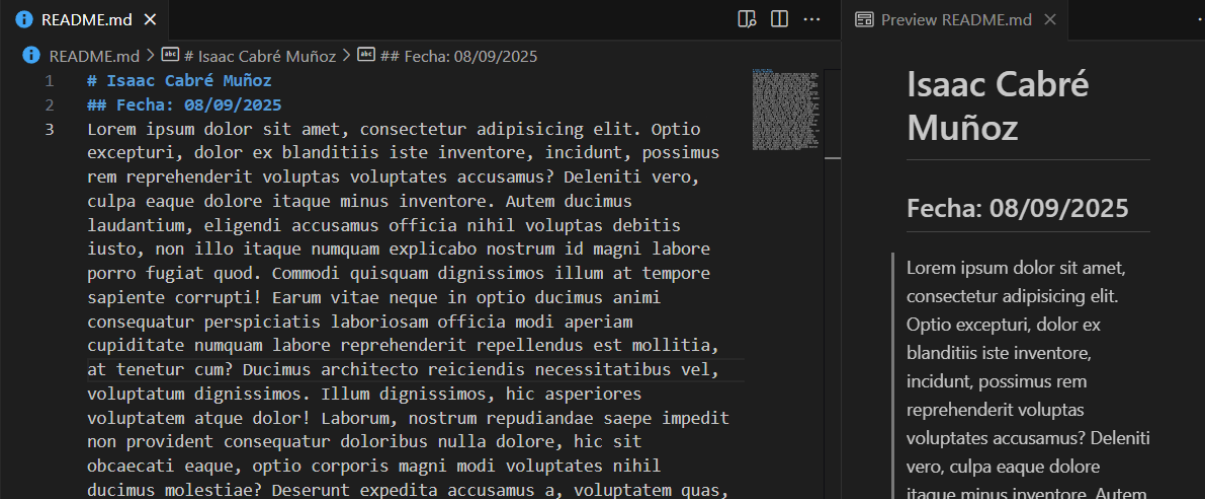

8. Piensa en que versión quieres, es muy importante estar seguro de lo que queremos hacer para no tener dolores de cabeza y no darle a cualquier opción sin pensarlo. ¿Qué versión quiero? ¿Con que cambios me quiero quedar? Y finalmente, soluciona el conflicto.

Quiero mi versión, ya que es la correcta es mi nombre y la fecha de hoy

Debemos elegir Accept Incoming Change en este caso, ya que es lo que hay en gitHub, que es la información correcta.

```
Accept Current Change | Accept Incoming Change | Accept Both Changes | Compare Changes
<<<<<<< HEAD (Current Change)
# Jaimito Fernández
## Fecha: 22/22/2222
=====
# Isaac Cabré Muñoz
## Fecha: 08/09/2025
>>>>>>> 22844c6f9e46994d12038e19ace24429189fd78b (Incoming Change)
```

Y luego ya no nos dará error

The screenshot shows a code editor with a dark theme. The left pane displays the raw Markdown content of a README file. The right pane shows a live preview of the rendered HTML. The editor's title bar includes tabs for 'README.md' and 'Preview README.md'. The file path in the breadcrumb is '# Isaac Cabré Muñoz > ## Fecha: 08/09/2025'. The code in the left pane includes a heading, a date, and a large block of Lorem Ipsum text. The preview pane on the right shows the corresponding HTML output, including the heading, date, and the text block.
